

**DELTA POINT**  
**OPEN POSITION**

**DATA ENGINEER II**

<b>Posting Date: August 30, 2023</b>	<b>FLSA: Exempt</b>
<b>Applications Due Date: Open until filled</b>	<b>Location: Wright Patterson Air Force Base</b>
<b>Job Type: Full-Time</b>	<b>Clearance: N/A</b>

**Position Summary:** Delta Point, LLC, a subsidiary of King Cove Corporation, is currently seeking a Data Engineer for Wright Patterson AFB. This position will provide ETL and data analysis to the AF Program Executive Office, Business Enterprise Systems (AFPEO BES), for the Maintenance, Repair and Overhaul initiative (MROi).

**Essential Duties and Responsibilities:**

- Transforms data into a format that can be easily analyzed by functional users and managers, analyzes data requirements.
- Consults with customers to identify and specify requirements; develops overall functions and systems requirements and specifications.
- Extracts data from multiple information systems, transforms into Excel tables for review and validation by data consumers at various locations.
- Develops or supports the development of data pipeline using programming languages such as Python and Scala.
- Conducts peer reviews with customers to demonstrate code performs as expected.
- Develops Structured Query Language (SQL) queries to query or retrieve data from multiple databases and to perform various operations on the data such as filtering rows and columns as well as simple data manipulation, Documents Extract, Transform, and Load (ETL) methodology and maintains a consistent and repeatable approach.
- Applies cloud-based engineering tools such as Databricks to process and transform and explore the data.
- Works in collaboration with the customer to document and follow agreed business rules to transform and format data.
- Other duties as assigned.

**Qualifications:**

**Education:**

Bachelor's degree in business or related field or four (4) years of related experience in lieu of degree is required.

**Experience:**

Non-supervisory – Ten (10) years of experience in data manipulation and visualization, research methodology, applied statistics or business intelligence solutions. Seven (7) years of experience with data modeling and extracting data from data marts.
